President

Problem

The company needed a shared storage solution to achieve HA and increase IT infrastructure performance at a reasonable price.

Solution

With StarWind VSAN, the company received a cost-efficient and reliable shared storage solution providing the desired HA, flexibility, and increased performance and eliminating downtime.

Problem

Prior to using **StarWind Virtual SAN (VSAN)**, **WebDesk Inc.** lacked high availability (HA) for centralized data storage and clustering. There were also other points of concern related to high downtime, additional upgrade costs, and low IT infrastructure performance. The company was looking for a shared storage solution that would eliminate the existing problems within its IT budget. In its search, **WebDesk Inc.** has tried other vendors, but **StarWind** checked all the boxes and has a reputation for uncommonly superb support. The level of support that StarWind provides made all the difference.

Solution

WebDesk Inc. has used **StarWind** since 2015 and has recently upgraded its StarWind platform to accommodate the need for both additional storage space and increased performance. **StarWind VSAN** provided the desired flexibility to easily scale up and addressed the cost concerns. With StarWind, WebDesk Inc. can upgrade seamlessly within a production environment with no downtime and within its IT budget. Thanks to **StarWind VSAN,** the company achieved HA and increased its storage capacity and performance requirements. The single upgrade of the **StarWind** platform saved **WebDesk Inc.** from $8.7K to $12.7K compared to two other vendors that made the top three. On top of everything, the company has received nothing short of excellent support from every **StarWind** tech it has had the pleasure of working with.

> We have never had a single problem resulting from the StarWind software. The software is stable and flawless. For us, there's no need to look elsewhere.
